The Aesthetic Meeting 2014

Dr. Movassaghi recently attended The Aesthetic Meeting 2014, "Building the Bridge Between Science and Art," an annual conference of the members of the American Society for Aesthetic Plastic Surgery (ASAPS). On the teaching team for two workshops, Dr. Movassaghi co-presented: Endoscopic Technique in Forehead and Mid-Face and Facial Rejuvenation by MACS Lift. In addition, he led a new seminar: Incorporating Shaped Textured Gel Implants (Round and Anatomic) in Breast Augmentation and Reconstruction. Currently serving as a board member, he also participated in the ASAPS Board of Directors meeting.

SPSSCS Annual Meeting 2014

I was proud to represent Dr. Movassaghi and Ziba Medical Spa at the annual meeting of the SPSSCS (Society of Plastic Surgical Skin Care Specialists) in San Francisco this spring.

A major portion of the classes and presentations that I attended focused on pigmentation of the skin, and how to treat, prevent and maintain healthy clear skin. SkinCeuticals is once again the leader in both sun protection and proving the science behind their new products. We are able to start treating the cause and not just the symptom of skin discolorations and pigmentations.

—Casey McNabb, Licensed Aesthetician

A New Standard in Eye Care!

SkinCeuticals new Physical Eye Defense SPF is a non-migrating, protective eye base that enhances skin tone with physical sun protection of both UVA/UVB in a 100% mineral base. It goes on smooth, enhancing and brightening around the eye area with the feel of a light primer.

Advanced Pigment Corrector

2013 Allure Best of Beauty Breakthrough Award Winner!

A daily multi-layer treatment to reduce stubborn discoloration and prevent reoccurrence, Advanced Pigment Corrector is clinically proven and tested on all ethnicities to help correct and prevent unwanted pigmentation. This powerful multi-layer treatment is a highly effective, safe, full-facial approach to reducing stubborn discolorations and preventing reoccurrence.
